This article is over 7 years old and may
contain outdated information While not every class uses combat pets in Diablo 3, every class can use non-combat pets to their heart's content. Whether it's a mini-version of the Lord of Terror or a murloc-treasure goblin hybrid, there's a Diablo 3 pet out there waiting for you to adopt it. The following is a complete list of all Diablo 3 pets as of the
release of Rise of the Necromancer (with many pictures courtesy of the Diablo wiki). There are a variety of ways to get pets — like buying collector's editions of specific Blizzard games or killing certain rare mobs in-game. Some pets are only available for a certain amount of time, so it's important to stay on top of events and new game releases. As
more pets come out, this list will be updated, so stay tuned! Pets That Are Available via Special Purchase in Diablo 3: Reaper of Souls Collector's/Deluxe Edition Purchase Not to be confused with the Fox show that stars Zooey Deschanel's sister. This little pup can be purchased as part of the bundle of extras that comes
with the Collector's/Deluxe editions of Diablo 3: Reaper of Souls. Half-Formed Golem Acquired via Rise of the Necromancer pack. Gaudy necromancer in mismatched armor not included. Probe Acquired via Starcraft II: Legacy of the
Void Collector's/Deluxe Edition Purchase Some alien probes are uncomfortable, but not this one. You can get this Protoss unit as a Diablo 3 pet by purchasing the collector's/deluxe editions of Starcraft II: Legacy of the Void. Pets Available Via Menagerist Goblin Drops in Diablo 3 The menagerist goblin is one of the rarest varieties of treasure goblin
and its spawn rate is unaffected by difficulty. It's rare because it's a guaranteed, random, unowned non-combat pet for each member in the party. You don't have to worry about duplicates! This mob is definitely high priority if you want to finish your Diablo 3 pet collection. Blaze The perfect companion for a wizard, this flaming skull is likely an
homage to Marvel's Ghost Rider. Rumor has it that if you idle long enough, Nicolas Cage's face briefly replaces Blaze's. Buddy While he's far from man's best friend, this pup is still your little Buddy. He'd appreciate tagging along with a necromancer to get in on some of that bone action. The Bumble This yeti is always ready to play Buck Bumble. How
do you think this Diablo 3 pet got its name? Charlotte If you're into depressing children's literature about arachnids, this is definitely the pet for you. Friendly Gauntlet Perfect for snapping its fingers along to the Addams Family theme with you. Or for holding your hand on long walks through the cemetery. Galthrak the Unhinged You know this guy is
down to party when he's got unhinged as a title. Or maybe he just unhinges his jaw when devouring prey. Grunkk Grunkk is a miniature version of the Siegebreaker from Act III. Keep him away from your mini-buildings! Haunting Hannah is hauntingly beautiful. Or maybe just hauntingly haunting. Humbart Wessel While not as good as Blaze
at riding motorcycles, Humbart is the champion of goofy names. Just don't let Zayl (Act V) know you took him. Lady Morthanlu Everyone's favorite lady goat since that one lady goat from Undertale, she's the perfect Diablo 3 pet for the adventurer with a taste for petting zoo animals with attitude. Lamb This non-combat pet is as cute as a mutton and
also a human child. Whose child is this? Where are his parents? Malfeasance Although this Diablo 3 pet has an air of horror and death around it, if you bond with it over the latest season of New Girl, it'll soon become your palfeasance. The Mimic How come mimics only ever mimic treasure chests? Why not mimes? Mime-ics, anyone? Ms. Madeleine
She may look like a character from a Korn album cover, but the flavor text describes her as "a happy go-lucky gal!" Overseer Lady Josephine The teddy bears in our world are happy and cuddly, but in Sanctuary, they're vengeful and hellbent. Still cuddly, though. Queen of the Succubi Now's your chance to adventure with demonic royalty. She may
even introduce you to her friend Morrigan Aensland. The Stomach The stomach is a great Diablo 3 pet to have if you never finish your plate. The lung is a better choice, though, if your character has asthma. That Which Must Not Be Named There's no pet here. I don't know what you're talking about. Unihorn This legendary beast has eluded humans
in the real world for too long. Now you can finally own one as a pet in Diablo 3. Part horse. Part horse. Part horse as a guaranteed drop from the TV show iZombie, this knife-wielding zombie can be found as a guaranteed drop from the
incredibly rare mob Ravi Lilywhite, Passionate Player in the Weeping Hollow in Act I. Pets That Are No Longer Available in Diablo 3 Seasonal journey of their respective seasons. They were only available during their given season, and thus can't be picked up if that season has
passed. Dream of Piers Acquired via completing Season 7 Chapter 4 This quarter-horse, quarter-biablo, half-horn hybrid was only available in Season 7. Frost Hound Acquired via completing Season 8. Frost Hound Acquired via completing Season 9. Frost Hou
Chapter 4 Disappointingly not voiced by Vin Diesel, you were able to get this pseudo-ent back in Season 5. Rocky Acquired via completing Season 9 Chapter 4 He's the best damned boxer who's also made of stone I've ever seen and he was available in Season 9. Blizzcon Pets Classic Diablo Acquired via Blizzcon 2016 Attendance/Virtual Ticket
Blizzard brought back the classic Lord of Terror in travel size for Blizzcon 2015 Attendance/Virtual Ticket Blizzard keeps finding ways to make cosmetic pets out of murlocs, and I'm all for it. This pet was available to Blizzcon 2015 attendees and virtual ticket holders. Event
Pets Royal Calf Acquired via Wirt's Stash During Anniversary Event To unlock this beautiful bovine, players had to craft Wirt's Stash during the anniversary event. The Butcher Acquired via Level 1 Anniversary Event Dungeon Run This meat is extra fresh and was only
available during the anniversary event. Players had to enter the cathedral and run the dungeon starting off at level 1 to get this baby boy. — That's all the Diablo 3 pets in the game so far. As more seasons, collector's editions, expansion packs, etc. come out, there will definitely be more. Do you have a favorite? East favorite? Frustrated that you

Affiliate Policy HowLongToBeatDiablo III NewsLoad More Not every class in Diablo 3 can have a pet to fight along side them, but everyone can have a non-combat pet to keep them company. These pets range from the adorable, like the yeti-themed pet The Bumble, to the grotesque, like — well, like almost every other pet. Galthrak the Unhinged
which is a demon that is mostly just a jaw. There's Grunkk, where they smoothed out the details of an Abomination. And let's not forget That Which Must not Be Named, which is definitely not a reference to the cow level, because there is no cow level. There are a lot of these pets to obtain, but very few sources for them. Here's where you
can go to find a probably not-cuddly friend. The Menagerist Goblin The majority of non-combat pets drop from the Menagerist Goblin. Obtaining a pet from him is easy — it's a 100% drop for everyone in the party, every time he is encountered. Better yet, it's guaranteed that the pet is not a duplicate. You get a new, unique pet each time. He has 19
different pets, and will keep players coming back. Like every other treasure goblin, just find him, chase him, and beat him down for his loot. The downside is, he is a very rare spawn, so finding him is difficult. There is a silver lining for the moment: treasure goblins spawn twice as often this season. That will help increase how often he'll show up. It is
important to note he has the same spawn chance on any difficulty. Don't worry about cranking it up to Torment, or expecting more reward for the extra struggle. If you want to farm him, run on a level you feel comfortable with. Throw YouTube up on another screen and go into mindless grind mode. Run the same level over and over. Just need to make
a new game to refresh the mobs in the level. Many players have their farming route laid out, and debate which is the best path. The treasure goblin has 24 spawn locations throughout all the Acts of D3, so there are lots of spots to discuss. Lots of people recommend rerunning The Weeping Hollow in Act I. One Menagerist Goblin can spawn here. With
the right build, this level can be cleared in as little as 30 seconds. This increases the number of attempts at finding a goblin in less time. This level has an extra bonus to it to, which we'll get to in a moment. Other people like to rerun Southern Highlands in Act I. In this level there is a cave called the Cave of the Moon. In both level 1 and level 2 of
the cave, a Menagerist Goblin can spawn. That is two chances at the goblin, close to each other, within the same level. This is an excellent level to keep farming to find this little loot piñata. With all the the differing opinions of which routes to take, this one is the hottest of the hot spots. There is double the chance in this one level, plus, general
consensus indicates there is a higher spawn chance here. Or so the statistics report. This following route is a lot longer, but will hit the important spots. This has been deemed one of the Damned -> Heart of the Damned Tower 
that is available to spawn at all times that is guaranteed to drop a pet. Ravi Lillywhite can spawn in The Weeping Hollow. The spawn rate is 1%, and he can spawn anywhere in the level. He ONLY spawns in Adventure Mode, not in Quest Mode. To find him, search and clear the entire map. If he is not there, exit and create a new game. Start anew,
clear and search again. Of course, while searching for him, keep an eye out for The Menagerist Goblin as well. With the drop chance, it should take — on average — a hundred tries. With the drop chance, it should take — on average — a hundred tries. With the right build on the character meant for speed and an easier setting, a full clear can be done in less than a minute. Spend an hour or two and this pet, along with a
couple from the goblin, you have increased your pet collection. The pet from Ravi is Liv Moore, name after the lead character from iZombie. An interesting pop culture shout out to that show and/or comic. D3 Seasonal Pet Most seasons of D3 reward a non-combat pet. Previous seasons' pets cannot be obtained. But don't dwell on the past, focus on the
present! Season 20 began in March, and this season's pet is called Bat, but it is more monster than animal. There is no set amount of time for a season, but three months is a good estimate. This monstrosity with wings will be around until summer, but no guarantee how much longer than that. Jump in, enjoy the season's festivities, and reap the
rewards. Purchased Pets There are a few pets that are a bonus addition to the game while purchasing other products. The Necromancer class for D3 was added later on. 3: Reaper of Souls, the Collector's and the Deluxe Editions added the pet Bones, so named because his bones are showing. They didn't put a lot of work into that name. To cross-promote games, there is a third pet that comes from purchasing a Blizzard product — but not a Diablo game. Protoss probe that will pick up gold that
it floats over. This is available to players who have purchased the Digital Deluxe or Collector's Edition of StarCraft II: Legacy of the Void. All in how you justify it. Keep Up-to-Date on Blizzard There are occasional special events that will
provide pets, too. Watch for promos, like the Virtual Ticket to BlizzCon, which has been supplying not only in-game events for D3 that have given out pets, too. But mostly, just always be on the lookout for the Menagerist Goblin. That's where the vast majority of pets are
hidden away. Skip to main content Reddit and its partners use cookies and similar technologies to provide you with a better experience. By accepting all cookies, you agree to our use of cookies and measure the effectiveness of

This game presents you
with the challenge of defeating demonic hordes across many places, and to be able to succeed on that you will need to keep our equipment updated, whether is our armor or our weapons. One of the materials that will help you to do that is the Death's Breath, and we'll talk about it. What Are Non-Combat Pets in Diablo 3? While you can have pets that
aid you in battle due to various skills, there are also non-combat pets that can only be summoned from Wardrobe like any other aesthetic item. These don't affect your gameplay in any significant way except for collecting gold for you, and you can have only one non-combat pet active at a time. Across the years, several pets were added as Seasonal
Rewards or as extra collectibles if you buy a Deluxe or Collector edition of several Blizzard games. Read More: How to Get Kanai's Cube In Diablo 3 goes as follows: Angelic GoblinAdded to the game in patch 2.6.7, as a reward for completing the Guardian chapter

I agree. This is just a suggestion: Have you considered copy/pasting your old thread into the OP and then edit/format it before clicking "Reply"? I
mean, if you had the time. 1 Like Of course. I could do that. Tias asked me if he could play with it though and I agreed to it. For now, I am fine with that. If he does not sort it out, then I will deal with it myself. Great to have this moved over. Great to have the have

After trying for over an hour and a half to get twitter in usable shape and failing 100%, I'm just beyond angry to the point it's actually causing harm to myself. Just took my blood
pressure for kicks and giggles and even with a full 10mg dose of Amlodipine I'm measuring 215/145, which is heart attack territory. I'll try to keep you updated by email since using twitter as my primary means of cummunication is no longer an option (for those that are wondering why this is a problem, have a looksee at just how bad it is now). Ugh
I'm so screwed up physically right now I can't even eat. So unfortunately this gets pushed back another day, I can't do much of anything when I'm this far into anxiety territory, 3 Likes Updated! Thank you Tias! I have not totally reviewed it, but love it so far! I am going to see if I can make the first post a Wiki so you can do what you want with it. Do
you think that is a good idea? 1 Like Cool!!! With animated GIF, double cool!!! With animated GIF, double cool!!! And three surprise kitties with mouse over text! I have 3 which is why they are likely there. I did make it a Wiki so, for now, as long as it is not abused it can be team edited. 2 Likes Only someone with TL3 will be able to edit this. It's got links galore in there (a couple
hundred in total I do believe). All I have to do in order to update this is update the individual files and then compile a new master file. Then you can post it (so it retains its green text). Also, unless done correctly, the subsequent edits will cause line breaks in between the closed flyout sections making it look bad. I've no problem doing the work and
handing the file over to you for copypasta. I did say I intended to make this easy peasy for you after all! Edit: For those viewing on mobile, you need to either use Landscape orientation or use your browser's request desktop site option. Otherwise the Discourse parser will cut off the third table column. It's a limitation of how its mobile version works
However, selecting the desktop site option in your mobile browser shows everything properly, if a bit tiny (at least on my Note 8 at native resolution). The Discourse wraps text fine, but not tables and especially not complex tables with multiple data in single cells (the first column of each row has two distinct data pieces to it). 2 Likes Nice job,

of protecting players from purchasing parts of the game without first having the base game on their account. PMG: Another question is if I bought this without WoW would I still get the D3 item?? This is actually worth asking Customer Support about. The base game is now free. All that is needed to play above level 20 is a subscription. The only part
that costs money is the latest expansion, Battle for Azeroth. So, logically everyone now has base WoW and should be able to buy the Digital Deluxe packs that come before BfA. If that fails to grant the items, they can always contact Blizz for a refund if they do so in a timely way (within a few days of purchase). 1 Like TheTias: I'm afraid not. The

Logged out of D3/launcher...Made the purchase...logged in to D3 and on game start it gave me the Legionnaire Achievement...went to Myriam and no helm transmog... Logged out again, exited launcher, relaunched, relogged in, started game and BAM there
they were. Sweet. Glad you got what you wanted, even if it was a bit glitchy. Edit: Guide edited with latest info and corrections. Thank you to all who catch any errors! Edit 2: Holy hell the Discourse parser's got bugs with copypasta. Took me using Beyond Compare to find the one tiny itty bitty tag that got munged making a part of the guide look
bugged. Yay for keeping previous versions of the master file handy! Awesome list/guide. I have been checking the old thread regularly for updates. I must say I am a bit disappointed that I did not manage to collect all, especially in the Seasons. However, one minor correction, if I may: The Tal'darim Probe seems to be back with the new SC2
WarChest, and it seems to be a regular (I'd wish they would put some new ones, or at least let us get some of the ones we don't have, instead of recycling this one all the time). I'll see about getting that updated and into the guide. Should be easy enough as it's only in two places. Guide updated for Season 19 and wings from BlizzCon Virtual Ticket. 3
Likes Thank you Tias!!! I really appreciate your help with this and keeping it updated. 1 Like Great job compiling this list. But... have these transmogs become account bound? all (old) information on the wikis state "no" but I just
 tested with another user (Looking for transmogs EU softcore realm) and I couldn't pick them up, neither the provider could trade them to me. Thanks for any input. I don't actually know! I thought white items were always able to be traded. If they are account bound don't they have a label indicating that? Are you testing with Meteorblade? If so feel
free to report back what you guys find out. Yes, the test was done with Meteorblade and unfortunately only the two common Star transmogs and the stormshield (all three I already had) could I pick up. Everything else was account bound, most items were white and a couple blue I think I've worked out what the problem is / was and it's entirely my
fault. In a thread a couple of months ago there was a question as to whether ramaladni's gifts could only be used on legendaries / level 70 items. In order to take a screenshot confirming that the gifts could even be used on level 1
white weapons. As I had over 400 gifts at the time, I did the same thing to each and every transmog I had in my Stash which, it seems, has turned them all into account bound items. The reason the helm, shoulders and shield were the only ones Alex could pick up is they were ones I couldn't have used a gift on. So, no, there's no new bug. It's entirely
my fault. I'm an idiot. Sorry. 3 Likes Oh! ok, that makes sense. Too bad (for me) Well then, that explains it. I suspect nobody else would likely modify a level 1
white item Yeah, it takes an incredible level of special to do that. I guess I might as well go ahead and salvage them as I can't trade them to people any more to give them the appearance. I feel so daft right now. Insert relevant double / triple face-palm GIF here 2 Likes does this one counts as a cosmetic? 27s Worn Edge If it shows up in the transmog
UI specifically with that name on one of the available sword items, then yes. Otherwise, no, since a lack of such in the transmog UI means it is merely using an already existing item appearance and is just there for flavor text. Anguish's Grasp is the bonus reward for S20's Chapters 1-4 completion. Should update the guide accordingly for those who

My Console and Battle.net Accounts - Blizzard Support This post Welcome Nintendo Switch Players! - #45 by Zombilicious-2140 - General Discussion - Overwatch Forums seems to indicate that linking does activate rewards for other Blizzard and don't have any consoles to test with. Just be aware
that if you get OW for the Switch, you must have an online subscription to Nintendo's service. Otherwise you can't play the game at all. There is no offline mode, though from what have read it is bundled with 3 months of Nintendo's service. After that, you have to pay for the subscription if you aren't already in it. 1 Like Is there any particular
reason why Wirt's Original Leg is not included in the season's transmog list for those who found it off-season? The Butcher's Cleaver, for example, is permanent, so should Wirt's Original Leg. It's such a rare transmog that makes it almost impossible to farm every season. New wings, just in, for the Diablo II 20th anniversary, via a Feat of Strength

The Achievement is titled Primeval Evils: Loggin in for a time honored destruction. Reward: Prime Evil Wings. Interesting; Druid themed wings. The Tias:
Druid themed wings Huh? The 20th anniversary wings are based on two of the prime evils. They have more of a druid look and feel, probably because of the way the bone underframe looks. Glad people will get to enjoy them. They'll be added to the guide when I can get to the update after my surgery. Meteorblade: based on two of the prime evils. In
the blog, it mentioned the wings are based on Baal. Interesting, Baal didn't have wings, but if he did, it is how it would looks like. Log in to Diablo II any time after June 29 to unlock your own tendinous Prime Evil Wings and represent the legacy you forged on Arreat Summit. Baal—as we saw in him in Diablo II—did not have wings, but try to imagine
what they would've looked like if he did, and if you could've fastened them to your hero's shoulders. Thanks for this post, extremely helpful Cosmetic guide updated today. Enjoy! 3 Likes Thank you You do a great job with the list and I really appreciate it! I was fine with my old text list but your fancy one is a bit much for me. Does anybody have access

With nothing more than this search... Thanks! Very interesting to see that Rise of the Necromancer DLC costs half of a pair of wings. There's another currency
though - stash space is 4,000 ... any idea how much that is in real money? The items in the shop are either priced in Yuan or platinum. I believe there are also in-game ways of earning platinum. Guide updated with Season 22 info and new pet. 5 Likes
